No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 64

Number 1, January 1994

HUMAN STUDIES

Jane L. Valentine, Mariano E. Cebrian, Gonzalo G. Garcia-vargas, Bahram Faraji, Jean Kuo, Herman J. Gibb, and Peter A. Lachenbruch. Daily Selenium Intake Estimates for Residents of Arsenic-Endemic Areas 1

Francisco J. Arenas-Huertero, Margarita Salazar-Flores, and Alvaro R. Osornio-Vargas. Ferruginous Bodies as Markers of Environmental Exposure to Inorganic Particles: Experience with 270 Autopsy Cases in Mexico 10

Karl T. Kelsey, Fen Xia, William J. Bodell, John D. Spengler, David C. Christiani, Douglas W. Dockery, and Howard L. Liber. Genotoxicity to Human Cells Induced by Air Particulates Isolated during the Kuwait Oil Fires 18

EPIDEMIOLOGY STUDIES

Joel Schwartz. What Are People Dying of on High Air Pollution Days? 26

Joel Schwartz. Air Pollution and Daily Mortality: A Review and Meta Analysis 36

TOXICOLOGY STUDY

John D. Hamilton, Ellen J. O'Flaherty, Richardus Ross, Rakesh Shukla, and Peter S. Gartside. Structural Equation Modeling and Nested ANOVA: Effects of Lead Exposure on Maternal and Fetal Growth in Rats 53

RISK ASSESSMENT

Bernard L. Cohen and Graham A. Colditz. Tests of the Linear-No Threshold Theory for Lung Cancer Induced by Exposure to Radon 65

EXPOSURE ASSESSMENT

Meri T. Koivusalo, Jouni J. K. Jaakkola, and Terttu Vartiainen. Drinking Water Mutagenicity in Past Exposure Assessment of the Studies on Drinking Water and Cancer: Application and Evaluation in Finland 90

Number 2, February 1994

HUMAN STUDY

Per Leanderson and Christer Tagesson. Cigarette Tar Promotes Neutrophil-Induced DNA Damage in Cultured Lung Cells 103

EPIDEMIOLOGY STUDIES

Muneko Nishijo, Hideaki Nakagawa, Yuko Morikawa, Masaji Tabata, Masami Senma, Yumiko Kitagawa, Shunichi Kawano, Masao Ishizaki, Naomichi Sugita, Masami Nishi, Teruhiko Kido, and Koji Nogawa. Prognostic Factors of Renal Dysfunction Induced by Environmental Cadmium Pollution 112

Daniel Wartenberg, Rodney Ehrlich, and David Lilienfeld. Environmental Tobacco Smoke and Childhood Asthma: Comparing Exposure Metrics Using Probability Plots 122

Gerard Hoek and Bert Brunekreef. Effects of Low-Level Winter Air Pollution Concentrations on Respiratory Health of Dutch Children 136

Donna Mergler, Guy Huel, Rosemarie Bowler, Anders Iregren, Suzanne Bélanger, Mary Baldwin, Robert Tardif, Audrey Smargiassi, and Luc Martin. Nervous System Dysfunction among Workers with Long-Term Exposure to Manganese 151

TOXICOLOGY STUDY

Xiao Yang Li, David Lamb, and Kenneth Donaldson. Mesothelial Cell Injury Caused by Pleural Leukocytes from Rats Treated with Intratracheal Instillation of Crocidolite Asbestos or *Corynebacterium parvum* 181

HUMAN EXPOSURE ASSESSMENT

Naoko Koizumi, Fumikazu Hatayama, and Kimiaki Sumino. Problems in the Analysis of Cadmium in Autopsied Tissues . . 192

Author Index for Volume 64 199

NOTICE

The Subject Index for Volume 64 will appear in the November 1994 issue as part of a cumulative index for the year 1994.

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts*. If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:

Environmental Research
Production Department
Academic Press, Inc.
Journal Division
525 B Street, Suite 1900
San Diego, CA 92101-4495

Correspondence and information concerning subscriptions should be addressed to:

Academic Press, Inc.
Journal Subscription Department
6277 Sea Harbor Drive
Orlando, FL 32887-4900

Personal Computer Disks. Manuscripts may be submitted to *Environmental Research* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this information for authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
